## Task 4 — UI Clone Challenge: Spotify Web Player

A pixel-perfect Spotify Web Player UI clone built with HTML5, CSS3, and vanilla JavaScript. Features a full sidebar with Your Library, a main content area with multiple shelves (Recently Played, Made for You, Popular Artists, New Releases), a functional music player bar with play/pause, next/previous, shuffle, repeat, progress bar, volume control, and dynamic background color changes. Fully responsive across all screen sizes.

## Requirements Checklist

- ✓ Cloned Spotify Web Player UI using HTML, CSS, and JavaScript
- ✓ Sidebar with logo, Home/Search nav, Your Library with playlists
- ✓ Main content with sticky topbar (arrows, Explore Premium, user menu)
- ✓ Hero section with dynamic gradient background per song
- ✓ Quick access grid (6 shortcut tiles with hover play buttons)
- ✓ Recently Played shelf — 6 album cards with hover green play button
- ✓ Made for You shelf — Daily Mix, Discover Weekly, Release Radar etc.
- ✓ Popular Artists shelf — circular artist cards
- ✓ New Releases shelf — latest singles
- ✓ Bottom player bar with album art, track info, heart button
- ✓ Play/Pause, Previous, Next controls with correct SVG icons
- ✓ Shuffle and Repeat toggle (turn green when active)
- ✓ Clickable progress bar with live timer
- ✓ Volume control bar with mute toggle
- ✓ Dynamic background color changes when a new song is selected
- ✓ Topbar darkens on scroll (backdrop blur effect)
- ✓ Good morning/afternoon/evening greeting based on time
- ✓ Fully responsive — 6 cols desktop → 4 → 3 → 2 on mobile
- ✓ Live hosted on GitHub Pages
- ✓ Source code on public GitHub repository

## Project File Structure

```
clone-spotify/ ■■■ index.html ← Full layout: sidebar, main content, player bar ■■■
style.css ← CSS Grid layout, responsive breakpoints, hover effects ■■■ script.js ←
Play/pause, next/prev, shuffle, repeat, progress, volume
```

## Key Code Snippets

### 1. CSS Grid Layout (style.css)

```
body { display: grid; grid-template-columns: 240px 1fr; grid-template-rows: 1fr 90px;
grid-template-areas: "sb main" "player player"; }
```

### 2. Dynamic Background on Song Change (script.js)

```
function setTrack(title, artist, art, color) {
document.getElementById('np-title').textContent = title;
document.getElementById('np-art').textContent = art;
document.getElementById('hero-bg').style.background = `linear-gradient(180deg,
${color}66 0%, #121212 100%)`; progress = 0; duration = Math.floor(Math.random() * 80) +
170; updateUI(); }
```

### 3. Progress Bar with Live Timer (script.js)

```
function startTick() { ticker = setInterval(() => { progress++; if (progress >=
duration) { isRepeat ? progress = 0 : nextTrack(); return; } updateUI(); }, 1000); }
function updateUI() { const p = (progress / duration) * 100;
document.getElementById('prog-fill').style.width = p + '%';
document.getElementById('cur').textContent = fmt(progress);
document.getElementById('dur').textContent = fmt(duration); }
```

### 4. Responsive Grid (style.css)

```
/* Desktop: 6 columns */ .cards { display: grid; grid-template-columns: repeat(6, 1fr);
gap: 1.25rem; } /* Tablet */ @media (max-width: 1200px) { .cards {
grid-template-columns: repeat(4, 1fr); } } /* Mobile */ @media (max-width: 600px) {
.cards { grid-template-columns: repeat(2, 1fr); } .sidebar { display: none; } }
```

## Technologies Used

| Technology      | Purpose                                                         |
|-----------------|-----------------------------------------------------------------|
| HTML5           | Full page structure, sidebar, cards, player bar                 |
| CSS3            | Grid layout, hover effects, responsive breakpoints, transitions |
| JavaScript ES6+ | Play/pause, next/prev, shuffle, repeat, progress, volume        |
| CSS Grid        | 3-area page layout (sidebar, main, player)                      |
| Google Fonts    | Inter typeface matching Spotify's typography                    |
| GitHub Pages    | Free live hosting                                               |
